

Media Preview Day:

North America's largest indoor boat show gets ready to debut the marine industry's "Best of 2025" from luxury yachts to electric surfboards and new "RV" boat

PLUS - An announcement of Canada's first-ever Powerboat Grand Prix Race coming to Toronto

Toronto, ON (Friday, January 17, 2025) - More than 1,000 boats of all sizes have anchored at the 67th Annual Toronto International Boat Show, which opens to the public on Saturday, January 18 - 26 at Enercare Centre. Media were invited for a sneak peek on Friday, January 17 to preview some of the most exciting new boat innovations and trends including the debut of e-foiling on the world's largest indoor lake - a growing sport that resembles surfing above water. Media got a first look at some of the newest electric boat models available in Canada, as well as the evolution of hybrid vessels such as the VIGO, that combines elements of a pontoon, RV camper, and houseboat - defining a new category of recreational boats.

PLUS - The "Roar on the Shore" will take on literal meaning this summer as the city gets ready to host the Toronto Offshore Powerboat Grand Prix, July 11-13, 2025. An exclusive announcement was made at the Toronto Boat Show by organizers of Race World Offshore; joined by Boating Ontario to comment on the economic impact of waterfront sporting events and tourism. Boating Ontario will also be presenting the Waterfront Tourism Summit on Thursday, January 23, 2025 at the Toronto Boat Show with special guest, Honourable Neil Lumsden, Ontario Minister of Sport.

2025 New Product Highlights:

For the full list of new products, go to the New Products Showcase at TorontoBoatShow.com

Princecraft Boats, Booth 1101

Trend Alert: Suspension tents aka Treehouses for adults. The world's comfiest portable shelters, built from the highest quality materials and precision engineered to elevate your adventure combining the comfort and versatility of a hammock with the security and multi-person functionality of a tent. Pitch it anywhere above ground, above water, or on a boat.

Discover Camping & Boating, Heritage Court

The Magic is actually not the buoy, but rather the ingenious design of a counterweighted tube. Tie the tube to the dock with 2 lines and you can place the buoy at a predetermined position. It will always be at equilibrium when the boat is not interacting with it at the dock.

Magic Buoy, G739

The first-ever modular tiled dock system. Fully edge system – offering smooth edges all around the dock giving a premium look and protecting boats and other equipment docked on the side of the platform.

Candock is the sponsor of the seminars program at 2025 TIBS.
