2026 Toronto International Boat Show Opens This Week!

Media Preview Day is Friday, January 16 Must-See New Products at This Year's Show

We look forward to welcoming you to the 68th Annual Toronto International Boat Show, North America's largest indoor boating event, opening on Saturday, January 17 to Sunday, January 25 at the Enercare Centre, Exhibition Place.

Please see below instructions regarding media accreditation; and details for the upcoming Media Day Preview on Friday, in advance of Opening Day.

MEDIA ACCREDITATION PICK-UP:

Media badges can be picked up at the **Show Office, Salon 103** (near Hall A) during public hours. Media who aren't able to submit for accreditation in advance can check-in at the Show Office for same-day access during the run of the show.

MEDIA PREVIEW DAY: FRIDAY, JAN. 16

Media are invited for a sneak peek of the 2026 Toronto Boat Show as exhibitors make final preparations ahead of Opening Day. This is an early opportunity to capture content and speak with exhibitors prior to public access.

Click [HERE](#) to RSVP to Media Preview

12:30pm – 1:00pm: Media Sign-In @ The Lake

A sneak peek of Pickleball on The Lake & Showcase of wakeboarding and e-foiling. Be one of the firsts to play pickleball on the Boat Show's floating pickleball court; and try boating activities such as glow-in-the-dark kayaking.

1:00pm – 2:00pm: Guided Tour

Speak with the exhibitors behind some of this year's must-see boats and innovations on display including:

- **Regal 43' SAV** – Canadian debut of Regal's 2026 sport-activity vessel featuring an innovative electronic "fold-out" hull that effortlessly expands the boat's entertainment square footage to do more fishing, diving, lounging, and to be the envy of the next sandbar party. (Booth #551)

- **Le Boat** - World largest luxury houseboat rental company with a fleet of over 900 boats including 34 in Canada. Le Boat offers a new way to staycation and cruise in your own private houseboat along popular boating destinations such as the Trent-Severn Waterway and Rideau Canal - no boat license required. (Le Boat, Booth #741)

- **ENVGO NV1: Hydrofoil 'Flying Boat'** – The North American debut of a Canadian-made hydrofoiling "flying" boat. ENVGO is introducing the company's first product, the NV1, a zero-emission 25ft electric hydrofoiling cruiser. Powered by a state-of-the-art hydrofoil system, electric powertrain, and intuitive AI-assisted control technology, the NV1 delivers a quiet, sustainable, and smooth 'flight' experience unlike any other. With ENVGO's advanced hydrofoil technology, the hull lifts above the water, dramatically reducing drag and extending range up to four times that of conventional electric boats. (Booth #617)

- **Nor-Tech 4000 Roadster** – An impressive high-performance powerboat that combines the leisure of a catamaran to comfortably seat eight; yet can satisfy the need for speed. The 4000 Roadster has a quad Mercury Racing 500R outboard setup (2000 HP) that can reach top speeds up to 200 km/h, showcasing impressive power-to-weight efficiency and stability for a boat of its size. (Booth #750)

- **Absolute 48' Coupe** – One of the largest boats on display at the 2026 Toronto Boat Show! The 48-ft Absolute Coupe's forward-thinking design allows for some the highest below-deck ceiling heights, 360 electronic panorama windows for uninterrupted views, and a strong commitment to sustainability with a solar-panelled transparent roof. The recent elimination of the federal luxury tax in Nov. 2025 marks a turning point for the marine sector, safeguarding thousands of skilled jobs and revitalizing manufacturing that was hit hard because of the levy – and marks the return of BIG boats! (Booth #800)

Guided Tour is optional. Media are welcome to browse on their own to meet with exhibitors of interest.

MORE Notable Debuts & Canadian-Made Products:

- **Ocean Air-Infused Coffees from Canada's Atlantic** – Story has it that when coffee beans were imported to Canada in the 1800s on wooden ships, the ocean air from the Atlantic would naturally infuse the coffee that created a distinct flavour profile. This flavour became long lost when steel vessels began replacing wooden ships, until **Saltwinds Coffee Company** was founded out of New Brunswick in 2022. Canadian co-founders Brad Rideout and chemist, Dr. Laura Richards, were inspired to re-create the legendary flavour with its proprietary ocean-air infusion process. The result is a smoother, less bitter and unforgettable coffee experience that has won international awards and earned an appearance on an upcoming episode of *Dragon's Den*, airing January 22! (Booth #G-246)

- **RAD Tracker is the "world's fastest tracked Amphibian!"** - RAD Tracker has created a new category of high-performance Amphibious Vehicles that combines the versatility of a snowmobile, ATV and watercraft. 20 years in the making, the **RAD Tracker RT5** is the invention of Canadian, Shawn Watling, who has been featured on Daily Planet for his invention of the rear-drive Snowmobile and received the Popular Science Invention of the Year Award in 2010. Frustrated with the steering and grip of traditional snowmobiles, Shawn decided to replace its skis with a pair of tracks, and the concept of a high-speed Twin Tracked Amphibian was born. (Booth #1307)

- **Yamaha 2026 CrossWave WaveRunner** - The only personal watercraft in the industry designed from the ground up to carry up to four passengers. The CrossWave features a full walkaround bow and deck – the largest and longest platform ever made by Yamaha, that provides exceptional comfort, stability, and storage capacity to stay out on the water longer. (Booth #951)

- Canadian boat manufacturer, **Princecraft**, will debut several new models across various categories from its **Sport 188 Phantom Edition** and the unveiling of the **Platinum 190**, designed to elevate the compact fishing and cruising experience. (Booth #1101)
